

Allied World//FrameWRXSM (pronounced "Frame Works") is a platform that provides a set of cyber risk management solutions. Developed in conjunction with key vendors, it offers services designed to enhance an organization's cyber security preparedness and its ability to respond to an event. Proactive, prescriptive and practical, *FrameWRX* helps organizations take control of their privacy and network security exposure in a rapidly evolving, inherently complex, environment.

WHAT ARE THE SERVICES FrameWRX OFFERS?

Based on the level of sophistication around privacy and network security, as well as the size of the organization, clients have the ability to select from three pre-packaged levels of *FrameWRX* services. These packaged services range from \$4,900 to \$12,900 and we can work with each client to determine which level of service best suits their organizational needs.

Each package includes a sub-set of the services described below:

ALLIED WORLD eRiskHUB[®] PORTAL

Provides access to information including *Allied World//FrameWRX*, Risk Manager & CISO Tools, and a News Center for relevant industry information.

CYBER KNOWLEDGE CENTER

- **Training Center:** Cyber security online training courses, including industry specific HIPAA and PCI segments. Ongoing awareness through bulletins, posters and webinars.
- **Advice Center:** Unlimited professional support with typical tasks and duties of a Chief Information Security Officer (virtual CISO).
- **Online Knowledge Center:** Incident Response Planning resources, and access to sample policies, procedures and agreements. State- and industry-specific guidance on HIPAA, GLBA, and breach notification laws.
- **Cyber Fitness Check:** Assess the organization's cyber security posture.

"TABLE TOP" EXERCISE

- Mock privacy incident fact set to test incident response capabilities.
- Participants receive a report highlighting areas of improvement.

CONSULTATIVE SERVICES

Access to a suite of flexible consultative services, including a cloud configuration audit (including Office 365), ransomware risk assessment, vulnerability assessment, a log monitoring consultation, or a CISO roundtable workshop. Clients can choose one service during each *FrameWRX* package period.

PHISHING READINESS

- Customized phishing assessment (up to two per policy period)
- Behavior trends and user metrics
- Education/training videos based on user responses

MOBILE SECURITY SELF-EVALUATION

Assesses mobile security, security controls, policies and procedures with suggestions for improvement.

HOW IS FrameWRX DIFFERENT??

With *FrameWRX*, organizations are not only purchasing a set of services. They are purchasing a guided process. From initial onboarding, every organization will have a dedicated *FrameWRX* specialist facilitating the entire process. Personal support is just a phone call away. With the dedicated *FrameWRX* unit, organizations are able to focus on engaging the platform to enhance their cyber security preparedness.
