Overview

References in this Financial Condition Report to the terms "we," "us," "our," the "Company" or other similar terms mean Allied World Assurance Company, AG, a Swiss company authorized by the Swiss Financial Market Supervisory Authority ("FINMA"), unless the context requires otherwise. References to the term "Allied World Switzerland" means Allied World Assurance Company Holdings, GmbH, the parent of the Company, and to the term "Allied World Group" means Allied World Switzerland and its subsidiaries. The Allied World Group is majority owned by Fairfax Financial Holdings Limited ("Fairfax"). References to "\$" are to the lawful currency of the United States. References to "CHF" are to the lawful currency of Switzerland.

This Financial Condition Report (this "Report") has been compiled in accordance with FINMA's Circular 2016/2 (Insurer Public Disclosure).

We will make available, free of charge through our website (www.awac.com), this Report as soon as reasonably practicable but no later than April 30, 2019. This Report has been reviewed and approved by the Board of Directors of the Company (the "Board").

Summary

We are a Swiss incorporated company authorized by FINMA to conduct insurance and reinsurance business. We, through our head office in Zug and Bermuda branch office, provide property, casualty and specialty insurance and reinsurance solutions to clients in Switzerland and worldwide. Further details on the Company's business activities are included in Section A of this Report.

The Company reported gross premium written of \$91.3 million in 2018 compared to \$95.5 million in 2017 and an underwriting loss of \$6.0 million in 2018 compared to an underwriting loss of \$17.2 million in 2017. The Company reported a net loss of \$4.1 million in 2018 compared to a net loss of \$14.8 million in 2017. Further details on the Company's performance in 2018 are included in Section B of this Report.

The Board has ultimate responsibility for ensuring that the Company complies with applicable regulatory requirements. The Board has established an effective system of governance to ensure the sound and prudent management of the Company's business. Further details on the Company's system of governance are included in Section C of this Report.

Risks relevant to the Company's business and operations are outlined in Section D of this Report. The primary risk for the Company is underwriting risk. We have established an enterprise risk management ("ERM") framework that is integrated into the management of our business to manage and monitor relevant risks.

In Section E of this Report, we describe the principles and methods used for valuation of the different asset classes. We also discuss the market-value assessment of the insurance provisions for solvency purposes.

As of December 31, 2018, the Company's Swiss Solvency Test (the "SST") ratio was 151% compared to 142% as of December 31, 2017. The target capital of \$143.5 million is \$8.6 million lower than the prior year. The risk-bearing capital amounts to \$206.0 million for 2018 and \$209.2 for 2017. Details of the composition of the target capital and risk-bearing capital are included in Sections F and G of this Report.

The annual quantitative reporting templates and the Swiss statutory financial statements for the year ended December 31, 2018 and report of the external auditor thereon, are included in the appendices hereto.

A. Business Activity

Our Strategy:

Our business objective is to generate attractive returns on equity while preserving our capital. We seek to achieve this objective by executing the following strategies:

- Capitalize on profitable underwriting opportunities. Our management and insurance
 and reinsurance underwriting teams are positioned to identify business with attractive
 risk/reward characteristics. We pursue a strategy that emphasizes profitability, not
 market share. Key elements of this strategy are prudent risk selection, appropriate
 pricing and adjusting our business mix to remain flexible and opportunistic. We seek
 ways to take advantage of underwriting opportunities that we believe will be
 profitable.
- Exercise underwriting and risk management discipline. We believe that we exercise underwriting and risk management discipline by: (i) maintaining a diverse spread of risk across product lines and geographic regions, (ii) managing our aggregate property catastrophe exposure through the application of sophisticated modelling tools, (iii) monitoring our exposures on non-property catastrophe coverages, (iv) adhering to underwriting guidelines across our business lines and (v) fostering a culture that focuses on ERM and strong internal controls.
- Employ a diversified investment strategy. We believe that we follow a diversified investment strategy designed to emphasize the preservation of capital, provide adequate liquidity for the prompt payment of claims and generate a positive return. Our investment portfolio consists primarily of investment-grade, fixed-maturity securities of short- to medium-term duration.

Material Lines of Business and Geographic Areas:

We provide innovative property, casualty and specialty insurance and reinsurance solutions to clients in Switzerland and worldwide.

- The focus of the reinsurance business is predominantly on property catastrophe reinsurance business and medium- to short-tail casualty reinsurance business with mainly European exposure.
- The focus of the direct insurance business, which is predominantly written from the Company's Bermuda branch, is on large multinational companies domiciled in North

America. From our Swiss head office, we write Swiss risks for multinational programs.

Distribution:

As a commercial insurer, we primarily offer products through independent intermediaries, including retail brokerage firms and excess and surplus lines wholesale brokers. We typically pay a commission to agents and brokers for business that we accept from them.

Due to a number of factors, including transactional size and complexity, the distribution infrastructure of the reinsurance marketplace is characterized by relatively few intermediary firms.

Company & Branch Information:

The Company is a public limited company ("Aktiengesellschaft") with its registered office at Park Tower, 15th Floor, Gubelstrasse 24, 6300 Zug, Switzerland (CHE-115.661.837). The Company's Bermuda branch office is located at 27 Richmond Road, Pembroke HM 08, Bermuda and is licensed as a Class 3A insurer by the Bermuda Monetary Authority.

The Company is a wholly-owned subsidiary of Allied World Switzerland. The Company's ultimate parent into which the results of the Company are consolidated is Fairfax.

Intra-group Transactions:

Pursuant to intra-group services agreements, certain of the Company's functions receive support from individuals and/or teams employed by certain subsidiaries of Allied World Switzerland, including accounting and treasury, investment management, information technology, catastrophe modelling, claims, internal audit, global placement coordination, human resources, legal and compliance, risk management, ceded reinsurance and operations.

There were no related-party transactions outside the ordinary conduct of business during the year ended December 31, 2018.

External Auditor:

The Company's external auditor is PricewaterhouseCoopers AG, an auditing firm subject to public supervision (Birchstrasse 160, 8050 Zurich, Switzerland).

Significant Events:

Except as otherwise disclosed in the financial statements, there were no significant business or other events that occurred during 2018 that had a material impact on the Company.

B. 2018 Performance

<u>Underwriting Performance</u>:

The following table summarizes the net underwriting results for the years ended December 31, 2018 and 2017. Details by line of business can be seen in Appendix A "Annual Quantitative Reporting Templates".

	<u>To</u>	<u>tal</u>	Direct S busine		Direct no busi		<u>Indir</u> busin	
	<u>2018</u>	<u>2017</u>	<u>2018</u>	<u>2017</u>	<u>2018</u>	<u>2017</u>	<u>2018</u>	2017
Gross premium written	91.3	95.5	0.8	0.9	33.3	38.1	57.3	56.6
Premium ceded	(35.1)	(31.7)	(0.4)	(0.5)	(21.2)	(20.4)	(13.5)	(10.8
Net premium written	56.2	63.8	0.4	0.4	12.1	17.7	43.8	45.7
Change in gross unearned premium	5.1	(6.0)	-	0.1	1.8	(1.6)	3.3	(4.6)
Change in ceded unearned premium	1.4	0.8	-	(0.1)	1.0	0.8	0.4	0.1
Net premium earned	62.7	58.6	0.4	0.5	14.9	16.9	47.5	41.2
Total income from underwriting	62.7	58.6	0.4	0.5	14.9	16.9	47.5	41.2
Losses and loss expenses paid, gross	(48.7)	(35.6)	-	-	(22.5)	(13.4)	(26.2)	(22.2
Losses and loss expenses paid, ceded	14.0	3.6	-	-	10.6	3.4	3.4	0.2
Change in reserves for losses and loss expenses, gross	(32.7)	(50.4)	0.6	0.5	(19.2)	(40.4)	(14.1)	(10.5
Change in reserves for losses and loss expenses, ceded	11.7	21.0	(0.2)	(0.2)	11.1	18.8	0.8	2.4
Net losses and loss expenses	(55.7)	(61.4)	0.4	0.3	(19.9)	(31.6)	(36.2)	(30.1
Acquisition costs and administrative expenses, gross	(20.8)	(21.9)	(2.1)	(0.5)	(4.1)	(5.3)	(14.6)	(16.1
Acquisition costs and administrative expenses, ceded	7.8	7.6	0.1	0.2	6.3	6.5	1.3	1.0
Net acquisition costs and administrative expenses	(13.0)	(14.3)	(1.9)	(0.3)	2.2	1.2	(13.3)	(15.1
Total expenses from underwriting business	(68.7)	(75.7)	(1.6)	-	(17.7)	(30.4)	(49.5)	(45.3
Net underwriting (loss)/profit	(6.0)	(17.1)	(1.2)	0.5	(2.8)	(13.6)	(2.0)	(4.0)
Investment income	6.2	7.2						
Investment expenses	(2.2)	(2.7)						
Net investment income	4.0	4.5						
Operating result	(2.0)	(12.6)						
Interest expenses for interest-bearing liabilities	(0.6)	(0.7)						
Other expenses	(1.5)	(0.1)						
Net loss before taxes	(4.1)	(13.4)						
Direct taxes		(1.4)						
Net loss	(4.1)	(14.8)						

Gross premium written for 2018 was \$91.3 million, a decrease of \$4.2 million from 2017, primarily due to a decrease in our non-Swiss professional lines and Swiss casualty reinsurance writings but slightly offset by Swiss catastrophe reinsurance business. Net

premium written for 2018 was \$56.2 million compared with \$63.8 million for 2017. Ceded premium for 2018 was \$35.1 million compared to \$31.7 million in 2017, which was mainly driven by an increase in the retrocession for natural catastrophe reinsurance business and the non-Swiss direct insurance business.

Net losses and loss expenses in 2018 amounted to \$55.7 million compared to \$61.4 million in 2017. The net loss ratio for the year decreased to 89% from 105% in 2017, an improvement primarily driven by a decrease in net claims incurred on direct business in the Company's Bermuda Branch, where net claims incurred in the property line of business decreased by \$15.0 million.

Acquisition costs, comprised of commissions and brokerage fees, are costs that are directly related to the acquisition of new and renewal business. Administrative expenses represent the necessary costs to maintain the Company's daily operations and administer its business and primarily consist of salary expenses, maintenance costs and professional fees. Net acquisition costs and administrative expenses were \$13.0 million for 2018 compared to \$14.3 million for 2017. Net acquisition costs decreased by \$0.6 million and administrative expenses decreased by \$0.7 million in 2018.

Investment Performance:

The following table shows a breakdown of the investment income and expenses by asset classes for the years ended December 31, 2018 and 2017.

	d expenses for the years ended Deco 2018			2017		
	<u>Debt</u> <u>Securities</u>	<u>Real</u> Estate	<u>Total</u>	<u>Debt</u> <u>Securities</u>	<u>Real</u> Estate	<u>Total</u>
Investment income	5.2	0.8	6.0	5.3	0.8	6.1
Realized gains	-	0.0	0.0	1.1	-	1.1
Accretion of bond	0.2	-	0.2			
Total investment income	5.4	0.8	6.2	6.4	0.8	7.2
Amortization/depreciation	-	(0.6)	(0.6)	(0.1)	(0.6)	(0.7)
Realized losses	(0.1)	-	(0.1)	(1.4)	-	(1.4)
Other investment expenses	(1.5)	-	(1.5)	(0.5)	-	(0.5)
Total investment expenses	(1.6)	(0.6)	(2.2)	(2.0)	(0.6)	(2.6)
Total net investment return	3.8	0.2	4.0	4.4	0.2	4.6

To help ensure adequate liquidity for the payment of claims, we take into account the maturity, duration of our investment portfolio and our liability profile. In making investment

decisions, we consider the impact of various catastrophic events to which we may be exposed. Our investment portfolio consists primarily of investment-grade, fixed-maturity securities of short- to medium-term duration, including a substantial allocation to government bonds and mixed-use real estate.

Total net investment return for 2018 was \$4.0 million compared to \$4.6 million for 2017. The decrease was driven by an increase in investment expenses, of \$1.0 million from the prior year. Rental income from real estate remained unchanged from 2017 at \$0.8 million and there were no realized gains or losses on real estate during 2018. We realized net losses of \$0.1 million in fixed maturity investments and other investments. Other investment expenses mainly consist of custody and investment fees for internal and external asset management.

C. Corporate Governance & Risk Management

Our corporate governance framework is reflective of the nature, scale and complexity of the Company's business.

Board of Directors:

The Board is the ultimate administrative, management and supervisory body of the Company and is responsible for ensuring that appropriate controls and procedures are maintained by the Company. The Board is also responsible for the effective, prudent and ethical oversight of the Company and is ultimately responsible for ensuring that risk and compliance are properly managed in the Company. The following individuals are members of the Board:

- Mr. Scott A. Carmilani, Chairman
- Mr. Wesley D. Dupont, Allied World Group director
- Mr. Martin Frey, independent non-executive director

Management:

The Company's management team is comprised of:

- Ms. Marie-Laure Queneuder, Managing Director and Chief Underwriting Officer
- Mr. Christoph Murg, Vice President, Finance and Treasurer
- Mr. Eric Pizarro, Senior Vice President, Head of Capital Modelling, with responsibility for the risk management function
- Mrs. Sarah Mitchell, Vice President, Assistant General Counsel, with responsibility for the compliance function

Risk Management:

Although the assumption of risk is inherent in our business, we believe that we have developed a strong ERM framework that is integrated into the management of our business. Our ERM framework consists of numerous systems, processes and controls with oversight by our management and the Board. It is implemented across the Company to identify, quantify, monitor and, where possible, mitigate internal and external risks that could materially impact our operations, financial condition and reputation.

The key elements of our ERM framework include the:

- Risk strategy and governance framework;
- Risk Register;
- Risk appetites and tolerances (and relevant monitoring procedures);
- Own risk and solvency assessment (the "ORSA") process and reports; and
- Swiss Solvency Test model (the "SST"), which is used to determine regulatory solvency capital requirements, and is comprised of FINMA's standard capital models for reinsurance (StandRe), market risk, credit risk, aggregation (collectively, the "FCM"), and an external vendor model for natural catastrophe risk.

Our ERM framework supports our Company-wide, risk-based, decision-making processes by providing reliable and timely risk information. Our primary ERM objectives are to ensure the sustainability of the Company and to maximize our risk-adjusted returns on capital. Our ERM framework is a dynamic process, with periodic updates being made to reflect organizational processes, changes in risk profiles and recalibration of models, as well as to stay current with changes within our industry and the global economic environment. Utilising the SST results, we review the relative interaction between risks impacting us from various sources, including our underwriting practices and the investments we make.

Our management's ERM efforts are overseen by the Board, which reviews and recommends the overall Company-wide risk appetite and oversees management's compliance therewith. The Board reviews risk management methodologies, standards, tolerances and strategies, and reviews management's processes for monitoring and aggregating risks across our organization.

The output from the ERM framework, including the SST results, are integrated into the management and strategic decision-making processes and completion of the ORSA.

The ORSA is a top-down strategic analysis process that integrates risk management, capital management and strategic planning to determine the current and future capital requirements of the Company. The output of the process provides the Company with a view of own solvency needs in the form of an annual report that is submitted to, and reviewed by, the Board.

Mr. Eric Pizarro, Senior Vice President, Head of Capital Modelling, is the manager responsible for the Company's risk management function. Mr. Pizarro is a Zug-based employee of the Company and reports to management and the Board on risk management matters.

Internal Controls System:

Our internal controls system is a critical component for the safe and sound operation of the Company, and comprises a coherent, comprehensive and continuous set of mechanisms designed to secure at least the following:

- The Company operates effectively and efficiently, and within agreed risk tolerances, as it pursues its objectives;
- Availability and reliability of financial and non-financial information; and
- Compliance with applicable laws and regulations.

We have implemented both entity-wide and process-specific control procedures that help management ensure that the Company's day-to-day operations are appropriately controlled. A mix of internal controls is required to ensure a robust internal controls environment throughout the Company. They include a range of activities as diverse as approvals, authorizations, verifications, reconciliations, reviews of operating performance, security of assets, segregation of duties, checks for compliance with agreed exposure limits and operating guidelines, and following-up on non-compliance.

Management is responsible for, and assumes ownership of, the internal controls system. They set the "tone at the top" for integrity and ethics to ensure a positive control environment, and they assign responsibility for the establishment of specific internal controls procedures. Management is accountable to the Board, which provides guidance and oversight. The Board, coupled with effective upward communication channels and capable financial, legal, risk management, actuarial, claims, human resources and internal audit functions, is a key element of our robust internal controls system.

Compliance Function:

The Company's compliance function promotes an organizational culture committed to integrity, ethical conduct and compliance with the law. It also sets standards, policies and procedures to provide reasonable assurance that the Company achieves its financial, operational and strategic objectives in accordance with its compliance obligations. In support of that mission, the compliance function:

- Works proactively with business partners to develop policies, procedures and processes that enable the Company to achieve its strategic objectives in a manner consistent with its ethical standards and applicable law;
- Drives the organization toward a business culture that builds and actively promotes compliance, and encourages and requires employees to conduct business with honesty and integrity in an ethical and law-abiding fashion;

- Promotes open and free communication regarding the Company's ethical and compliance obligations, including mechanisms that allow for anonymity or confidentiality so that the organization's employees may report or seek guidance regarding potential or actual wrongdoing without fear of retaliation;
- Provides training and guidance regarding applicable laws, regulations and the Company's policies, and clearly communicates ethical guidance;
- Identifies compliance risks affecting the Company and works to minimize those risks;
- Prevents or promptly detects and resolves issues of misconduct or non-compliance to the extent possible; and
- Takes whatever steps may reasonably be necessary to enhance and protect the Company's reputation for integrity and ethics throughout its business community.

Ms. Sarah Mitchell, Vice President, Assistant General Counsel, is the manager responsible for the Company's compliance function. Ms. Mitchell is a Zug-based employee of the Company and reports to management and the Board on compliance matters.

Internal Audit Function:

The Company's internal audit function provides an independent and objective assurance and consulting activity that is guided by a philosophy of adding value to improve the operations of the Company. It assists the Company in accomplishing its objectives by bringing a systematic and disciplined approach to evaluate and improve the effectiveness of the Company's risk management, control and governance processes. The Company's internal audit function governs itself by adherence to the mandatory elements of The Institute of Internal Auditors' International Professional Practices Framework, including the Core Principles for the Professional Practice of Internal Auditing, the Code of Ethics, the International Standards for the Professional Practice of Internal Auditing, and the Definition of Internal Auditing.

The Company's internal audit function reports to the Board on the design and effectiveness of internal controls. In addition, the internal audit function tests how well existing internal controls are functioning and recommends any necessary changes and improvements. This includes performing examinations of operating and financial controls; conducting efficiency and effectiveness reviews; conducting reviews of compliance with laws and other external regulations; and evaluating the design and execution of internal controls and the Company's Risk Register.

The Company's internal audit function is free from interference from any element in the organization in order to maintain the necessary independence, including on matters of audit selection, scope, procedures, frequency, timing or report content. The Company's internal audit function has no direct operational responsibility or authority over any of the activities audited. The Company's internal audit function does not implement internal controls,

develop procedures, install systems, prepare records or engage in any other activity that may impair an internal auditor's judgment.

D. Risk Profile

The Company utilizes various tools to assist in the identification and assessment of risks in order to obtain a holistic view of its risk profile and enable the organization to assess the relationships between material risks. We have identified the following as the main categories of risk within our business:

- *Insurance risk*: Risk of fluctuations in benefits payable to policyholders and cedents, including premium risk, catastrophe risk and reserve risk. This is the primary risk for the Company.
- Credit risk: This primarily emanates from the ceding of claims and expenses on
 policies we write to other reinsurers. The ceding of claims and expenses to other
 reinsurers is a principal risk management activity, and it requires careful monitoring
 of the concentration of our reinsured exposures and the creditworthiness of the
 reinsurers to which we cede business.
- *Market risk*: The Company's largest exposures are to interest rate risk, spreads, foreign exchange rate risk and real estate. The Company does not have exposure to equity risk, hedge funds or other alternative investments.
- Operational risk: Encompasses a wide range of risks related to our operations, including corporate governance, claims settlement processes, regulatory compliance, employment practices, human resources and information technology exposures (including disaster recovery, cyber-security and business continuity planning).
- Other risk: The primary contributors to this risk are group and strategic risk. Group risk is the adverse impact on the Company as a result of corporate group interactions and/or reputation. Strategic risk arises from the inability to implement or achieve appropriate business plans and/or strategies.

The Company utilizes various tools to assess these material risks, including the SST, the FCM, external vendor models for natural catastrophe risk, the ORSA, the Risk Register, and stress and scenario testing.

The Company underwrites catastrophe exposures which, by definition, are a source of concentration risk. Catastrophe risk is quantified and monitored using third-party catastrophe models and mitigated using outwards reinsurance.

The Company has two significant risk concentrations other than the catastrophic risk noted above. The Company owns real estate in Zug valued at \$37.5 million. The Company also holds \$261.8 million of U.S. dollar-denominated U.S. government bonds. Each of these risk concentrations has been considered via scenarios within the SST.

Risk Mitigation:

We use three forms of risk mitigation: (1) avoidance of risk, (2) transference of risk (*e.g.*, reinsurance purchasing), and (3) limitation of risk (*e.g.*, setting risk appetite limits and tolerances, establishment of risk controls, etc.).

Risk Scenarios and Expected Shortfall:

We assess the risk profile quantitatively through the Solvency Capital Requirement ("SCR") of the SST.

Expected shortfall from SST by risk category as of December	r 31, 2018 (\$ m's)
	Expected Shortfall
1) Distribution based model	
Insurance risk	(117.6)
Market risk	(10.7)
(Insurance and market risk)	(119.7)
2) Aggregation with scenarios	
(Insurance and market risk)	(119.9)
3) Expected Result (financial result, technical result)	
Expected insurance result	(4.3)
Expected financial performance over 1 year risk free	(1.3)
(Insurance and market risk) incl. expected result	(114.2)
4) Aggregation with credit risk	
Credit risk	(7.5)
Capital for insurance, market and credit risks (SCR)	(121.7)
5) Market value margin	
Discounted market value margin	(21.9)
Target capital	(143.5)

The insurance risk calculation incorporates 25 scenarios specified by FINMA and three scenarios defined by the Company. The reinsurance portfolio, and in particular reinsurance property catastrophe business, is the main driver of insurance risk for the Company. The primary driver of catastrophic risk stems from perils within Europe. Catastrophe risk is quantified with an external vendor model.

Market risk, credit risk, risk aggregation and market value margin are quantified using the FCM.

There have been no significant changes in the risks to which the Company is exposed during 2018.

The Company does not attempt to quantify the operational risks to which it is exposed. It does however seek to reduce the likelihood and severity of operational risks through its ERM framework, as described above. Taking into account the controls in place that mitigate operational risks, there is a low likelihood of an operational risk loss of any significance.

E. Valuation for Solvency Purposes

Market Value Assessment of Assets:

The following table shows the assets used for solvency purposes as of December 31, 2018:

Assets used for solvency purposes as of December 31, 2018 (\$ m's)						
	<u>Original</u> <u>Currency</u>	Statutory	<u>Market</u> <u>Value</u>	<u>Difference</u>		
Real estate	CHF	24.3	24.3	-		
Fixed-income securities	Multiple	322.6	319.2	3.4		
Other investments	USD	21.3	21.2	0.1		
Other investments	USD	21.3	21.2	0.1		
Total investments		368.2	364.7	3.5		
Other assets						
Cash and cash receivables	Multiple	11.0	11.0	-		
Receivables from insurance business	Multiple	25.0	25.0	-		
Fixed assets	Multiple	13.5	13.5	-		
Other receivables	Multiple	-	-	-		
Other assets	Multiple	1.7	1.7	-		
Total other assets	_	51.2	51.2	-		
Total market-consistent value of assets	_	419.4	415.9	3.5		

The statutory amounts shown above are consistent with the Company's audited statutory financial statements as of December 31, 2018. Fixed maturity investments, reinsurance recoverables (shown as negative liabilities), other investments and (re)insurance balances receivable are presented differently compared to the audited statutory financial statements. The differences are reconcilable. The presentation above is consistent with that used in the SST for the year ended December 31, 2018.

The market value assessment of assets for solvency purposes has resulted in the following differences with the valuation shown in the audited financials.

• Fixed maturity investments and other investments: For solvency purposes, all investments are carried at their current fair value. For statutory purposes, they are carried at a maximum value equal to their amortized cost, less impairment. Under this valuation principle, the value of the investments (including other investments) exceeded their current market value by \$3.5 million as of December 31, 2018.

The fair value of investments in fixed maturity securities and other investments is the market value. Market value is the amount for which an asset or liability could be exchanged

between willing parties in an arm's length transaction. Market values are determined at prices quoted in active markets. In some instances, such price information is not available for all instruments and in such cases, the Company applies valuation techniques to measure their value. These valuation techniques make maximum use of observable market data, where relevant. There is no standard model, and different assumptions may generate different results. Fair values are subject to a control framework designed to ensure that input variables and output are assessed independently of the risk taker. The Company has minimal exposure to financial assets or liabilities for which there are no quoted prices in an active market.

The Company's statutory financial statements have been prepared in accordance with the Swiss accounting and financial reporting legislation, Art. 957 to 962 Code of Obligation and the relevant insurance supervisory law, particularly with the revised Insurance Supervisory Ordinance and the revised Insurance Supervisory Ordinance – FINMA.

The Company has access to additional assets in the event that its solvency ratio falls below 101%. A security assignment agreement exists between the Company and Allied World Assurance Company, Ltd ("Allied World Bermuda"), pursuant to which Allied World Bermuda will provide, through a security assignment account (the "Security Assignment Account"), amounts sufficient to raise the solvency ratio to 101%. As of December 31, 2018, the Company's solvency ratio exceeded 101% and as a result the value of the security assignment account was not required to be included in the statutory or market value assets shown above.

Statutory Technical Provisions:

Under the Swiss insurance regulatory regime, the statutory technical provisions are the sum of the following balance sheet items:

- Reserves for losses and loss expenses,
- Unearned premiums reserves, and
- Equalization reserves.

The claims and premium components are calculated both gross and net of outwards reinsurance, while the equalization reserves component is calculated net of outwards reinsurance.

The reserves for losses and loss expenses are the undiscounted best estimate of all future cash flows relating to claim events prior to the valuation date. It accounts for both claims reported but not yet settled, and claims incurred but not yet reported.

For ultimate loss projections, we have relied on commonly used actuarial methods, including loss development, Bornhuetter-Ferguson and expected ratio methods. In general, we have selected a combination of paid and reported development methods (shorter-tail lines of business) with the Bornhuetter-Ferguson method (longer-tail lines of business) for the

older years and the expected ratio method for the more recent years. We have generally selected methods based on the reported losses rather than paid losses due to the additional information contained within the reported data and a stable case estimation process over time.

When selecting development patterns, we have been careful to investigate any trends in development over time. When trends have been identified, we have sought to understand the reason for the trends, and have selected an appropriate history for the weighted average selection. For longer-tail lines of business, we have largely based our loss development pattern selections on industry benchmarks due to insufficient loss development experience.

The unearned premium component is the undiscounted best estimate of the unearned portion relating to the future exposure arising from policies under which the (re)insurer is obligated at the valuation date. It is calculated using the pro rata temporis method.

The level of uncertainty associated with technical provisions is the extent to which future cash flows can be estimated. There is the inherent uncertainty in insurance claims that historical experience will not be entirely predictive of future claims:

- Such uncertainty is higher for longer-tailed lines of business. Direct and assumed liability lines take longer to develop and are, therefore, more susceptible to this type of uncertainty. This is particularly true of excess casualty and professional lines.
- The selection of initial expected loss ratios, which are largely based on the Company's pricing assumptions expectations and experience to date, are also a key area of uncertainty.

This uncertainty is the rationale for maintaining the equalization reserve, because these technical provisions, by their nature, cannot be quantified precisely and are subject to random fluctuations. This reserve is calculated as the margin to bring the held net unpaid loss and loss expenses (usually considered as best estimate) to the 80th percentile of the distribution of all possible outcomes based on stochastic simulations.

The breakdown of the insurance reserves indicating gross amount, reinsurers' share and the amount for own account as of December 31, 2018 and 2017 is shown in the following table:

	<u>2018</u>	<u>2017</u>
Reserves for losses and loss expenses, gross	249.6	222.3
Reserves for losses and loss expenses, ceded	(73.5)	(61.9)
Reserves for losses and loss expenses, net	176.1	160.4
Unearned premium, gross	31.0	36.1
Unearned premium, ceded	(13.2)	(11.8)
Unearned premium, net	17.8	24.3
Equalization reserve	21.4	18.5
Total insurance reserve, net	215.3	203.2

The Company's Responsible Actuary provides an independent opinion on the technical provisions on an annual basis. His opinion is documented in the Responsible Actuary Report, which is presented to and discussed with the Board on an annual basis.

Market Value Assessment of Technical Provisions and Other Liabilities:

The following table shows the liabilities used for solvency purposes as of December 31, 2018:

Liabilities used for solvency purposes as of December 31, 2018 (\$ m's)					
	<u>Original</u> <u>Currency</u>	Statutory	Market Value	<u>Difference</u>	
Reserves - loss and LAE	Multiple	249.6	234.0	15.6	
Ceded reserves - loss and LAE	Multiple	(73.5)	(67.8)	(5.7)	
Reserves - UPR	Multiple	31.0	27.9	3.1	
Ceded reserves - UPR	Multiple	(13.2)	(12.2)	(1.0)	
Equalization reserve	USD	21.4	-	21.4	
Other long term debt	CHF	17.0	17.0	-	
Insurance payables	Multiple	7.8	7.8	-	
Accrued liabilities	Multiple	1.1	1.1	-	
Other payables	Multiple	4.3	2.2	2.1	
Total liabilities	_	245.5	209.9	35.6	
	=				

The Company does not have any major risk concentrations on the liability side. Its insurance and reinsurance portfolios are well diversified with business written in Switzerland and Bermuda. Regarding retrocession, the Company has agreements with over 30 reinsurers.

Market values for insurance liabilities have been calculated based on the following information:

- Estimated undiscounted loss reserves, gross and net of reinsurance, by reporting line of business;
- Estimated undiscounted unearned premium reserves, gross and net of reinsurance, by reporting line of business;
- Estimated expected profitability (*i.e.*, loss and expense ratios) for the business underwritten but not fully earned; and
- Estimated payment patterns by reserving line of business.

For the best estimate of the net loss and allocated loss adjustment expense ("ALAE"), we have relied on the undiscounted best estimate from the Company's Responsible Actuary.

The net best estimates (including unallocated loss adjustment expense ("ULAE")) for each line are discounted using an average of the FINMA mandated discount rates for CHF, EUR, GBP and \$, weighted by the proportion of undiscounted reserves in that currency (after conversion to \$).

The net unearned premium reserve for each line is calculated as the net unearned premium, less the expected profit in the net unearned premium. The expected profit is calculated from the planned 2019 net combined loss ratio for the given line of business. As for the loss and ALAE reserves, the discount factor is a weighted value based on the proportions from the underlying currencies of CHF, EUR, GBP and \$.

The differences between the statutory and market valuations are driven by:

- The discounting effect of the gross and ceded loss and LAE reserves on the market valuation;
- The discounting effect and adjustment for profitability of unearned premiums on the market valuation;
- The inclusion of equalization reserves in the Company's statutory balance sheet (as of December 31, 2018, the equalization reserves amounted to \$21.4 million and are not included in the market valuation of liabilities); and

• A deferred tax liability of \$0.8 million. Deferred tax liabilities reflect the tax impact of temporary differences between the valuation of assets and liabilities for financial reporting purposes.

The Company does not use any alternative methods for valuation.

Mortgage and other long-term debt are valued at nominal value. The market values used for solvency purposes agree with the financials for all other liability classes.

The principles and methods stated above are used to assign market consistent values to the positions of assets and liabilities. The balance sheet is not exposed to any exceptional risks or concentration of risks that create significant uncertainties in these valuations. The market valuations are therefore a reasonable assessment of the capital available to meet the minimum capital required by the SST target capital.

F. Capital Management

The Company seeks at all times to hold sufficient capital to meet its current and projected business activities and to comply with all applicable laws and regulations. The Company strives to maintain an SST ratio in excess of 120%. As a part of the ORSA process, the Company evaluates scenarios that could threaten its solvency over a three-year time horizon.

The breakdown of the statutory own funds as of December 31, 2018 and 2017 is shown in the following table:

Statutory own funds (shareholders' equity) as of December 31, 2018 and 2017 (\$ m's)				
	2018	<u>2017</u>		
Share capital	10.1	10.1		
Capital reserve from tax capital contributions	40.9	40.9		
Other statutory capital reserve	100.9	100.9		
Retained earnings	22.0	26.1		
Total statutory own funds	173.9	178.0		

The aggregate composition of the risk-bearing capital as of December 31, 2018 and 2017 is as follows (and the complete composition can be seen in Appendix A "Annual Quantitative Reporting Templates - Market-consistent Balance Sheet Solo"):

Market-consistent Balance Sheet as of December 31, 2018 and 2017 (\$ m's)					
	<u>2018</u>	<u>2017</u>	Differe		
Total investments	364.7	359.2	5.5		
Total other assets	51.2	51.4	(0.2)		
Total market-consistent value of assets	415.9	410.6	5.3		
Total best estimate provision for liabilities	261.9	241.1	20.8		
Total reinsurers' share of liabilities	(80.1)	(69.3)	(10.8)		
Total insurance technical liabilities	181.8	171.8	10.0		
Total other liabilities	28.1	29.5	(1.4)		
Total market-consistent value of liabilities	209.9	201.3	8.6		
Risk-bearing capital	206.0	209.2	(3.2)		

The following table contains a reconciliation of statutory own funds and market value risk-bearing capital as of December 31, 2018 and 2017:

Risk-bearing capital as of December 31, 2018 and 2017 (\$ m's)				
	<u>2018</u>	<u>2017</u>		
Total statutory own funds	173.9	178.0		
Re-evaluation of investments	(3.4)	(1.1)		
Equalization reserves	21.4	18.5		
Re-evaluation of technical reserves	12.0	12.9		
Re-evaluation of receivables/payables	2.1	2.3		
Deferred taxes	-	(1.4)		
Risk-bearing capital	206.0	209.2		

The risk bearing capital decreased by \$3.2 million to \$206.0 million in 2018 compared to 2017. The decrease is primarily driven by the market-consistent valuation of the technical liabilities, which increased by \$2.0 million, and the exclusion of the deferred tax liability of \$1.4 million. This was partly offset by the higher deviation of the market value of the fixed-income securities compared to the amortized cost value.

Furthermore, the Security Assignment Account remains in place; however, from January 1, 2017, its value can no longer be credited to risk-bearing capital above the amount needed to raise the Solvency Ratio to 101%.

G. Solvency

The calculation of non-catastrophe insurance risk capital was undertaken according to FINMA's specifications for the SST standard model for reinsurers ("StandRe"). In following these specifications, we have relied primarily on the Company's own experience to model non-catastrophe risk. In addition, we have included 25 scenarios specified by FINMA and three scenarios specified by the Company. Aggregation within insurance risk follows StandRe requirements. Natural catastrophe risk was modelled with an external vendor model.

The Company continues to model its largest risk, natural catastrophe, with the same external model. However, a new version release will be used for the 2019 SST, and this is expected to contribute to a lower level of insurance risk.

Market risk, credit risk, aggregation with insurance risk and the risk margin were calculated in the FCM.

Components of the Target Capital:

The following are the components of target capital (as specified in the SST standard template) as of December 31, 2018 and 2017:

Target capital as of December 31, 2018 and 2017 (\$ m's)				
Expected shortfall @ 99%	<u>2018</u>	<u>2017</u>		
Insurance risk	(117.6)	(132.9)		
Market risk	(10.7)	(13.8)		
(Insurance and market risk)	(119.7)	(134.0)		
(Insurance and market risk) including scenarios	(119.9)	(134.2)		
Expected Results				
Insurance result	(4.3)	4.2		
Financial result	(1.3)	1.2		
Expected shortfall (insurance and market risk) including expected results	(114.2)	(128.7)		
Credit risk	(7.5)	(8.0)		
Risk margin	(21.9)	(15.4)		
Total target capital	(143.5)	(152.1)		

The increase in market risk is primarily due to changes in the FCM. The increase in the risk margin is due to differences between the FCM used in 2019, compared to the Company's own calculation in 2018.

Components of Market Risk:

The table below shows the major components of market risk as of December 31, 2018 and 2017:

Market risk as of December 31, 2018 and 2017 (\$ m's)				
Market Risk (Expected shortfall @ 99%)	<u>2018</u>	<u>2017</u>		
Interest rate risk	(5.5)	(3.5)		
Interest rate CHF	(0.5)	(0.7)		
Interest rate EUR	(3.9)	(2.4)		
Interest rate \$	(6.6)	(4.9)		
Interest rate GBP	(4.7)	(1.4)		
Spreads	(2.1)	(3.3)		
FX-risk total	(9.4)	(9.2)		
Equity		0.0		
Real estate	(6.7)	(8.4)		
Hedge funds		0.0		
Private equity		0.0		
Participations		0.0		
Total	(10.7)	(13.8)		

Components of Insurance Risk:

The table below shows the components of insurance risk, along with a comparison to the prior year, in order to highlight significant movements as of December 31, 2018 and 2017:

Insurance Risk as of December 31, 2018 and 2017 (\$ m's)						
Insurance Risk (ES @ 99%)	<u>2018</u>	<u>2017</u>				
Reserve risk - attritional	(58.7)	(52.6)				
Individual events - prior years	(24.4)	(19.6)				
Premium risk - attritional	(22.9)	(24.2)				
Individual events - current year	(79.2)	(59.4)				
Natural catastrophe events	(92.3)	(104.8)				
Diversification	(159.9)	(127.7)				
Total insurance risk	(117.6)	(132.9)				

Insurance risk decreased as a result of the decrease in natural catastrophe risk, following the adoption of an updated version of the external vendor model used for natural catastrophe risk. In addition, the diversification credit has increased, which reflects the relatively smaller size of natural catastrophe risk relative to the other insurance risk components. The following table shows a comparison of the SST ratio components as of December 31, 2018 and 2017:

Solvency as of December 31, 2018 and 2017 (\$ m's)						
	<u>2018</u>	<u>2017</u>				
Capital for insurance, market and credit risks (SCR)	(121.7)	(136.7)				
Risk margin	(21.9)	(15.4)				
Target capital	(143.5)	(152.1)				
Risk-bearing capital	(206.0)	(209.2)				
SST Ratio	151.3%	141.7%				

The increase in the SST ratio reflects the reduction in the SCR, which in turn is the result of a decrease in insurance risk, as discussed above.

Report of the Statutory Auditor

Allied World Assurance Company AG

Zug

Report of the statutory auditor to the General Meeting

on the financial statements 2018

Report of the statutory auditor

to the General Meeting of Allied World Assurance Company AG

Zug

Report of the statutory auditor on the financial statements

As statutory auditor, we have audited the accompanying financial statements of Allied World Assurance Company AG, which comprise the balance sheet, income statement and notes, for the year ended 31 December 2018.

Managements' responsibility

Management is responsible for the preparation of the financial statements in accordance with the requirements of Swiss law and the company's articles of incorporation. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error. Management is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements for the year ended 31 December 2018 comply with Swiss law and the company's articles of incorporation.

Report on other legal requirements

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) and independence (article 728 CO and article 11 AOA) and that there are no circumstances incompatible with our independence.

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists which has been designed for the preparation of financial statements according to the instructions of management.

We further confirm that the proposed appropriation of available earnings complies with Swiss law and the company's articles of incorporation. We recommend that the financial statements submitted to you be approved.

Allied World Assurance Company, AG Statutory Financial Statements Management Report 2018

Management Report 2018

General

Allied World Assurance Company, AG (the "Company") was incorporated in Switzerland in the Canton of Zug on May 6, 2010. On March 30, 2011, the Company obtained a license from the Swiss Financial Market Supervisory Authority ("FINMA") to conduct business in non-life direct insurance and reinsurance. In 2012, the Company established a Bermuda branch in order to offer its insurance products via Bermuda throughout the United States of America ("USA"). Since April 2012, the Company is registered as a Class 3A insurer under the Bermuda Insurance Law 1978. The Company is a wholly-owned subsidiary of Allied World Assurance Company Holdings, GmbH (the "Holding Company") and has its head office at Park Tower, Gubelstrasse 24, 6300 Zug, Switzerland. The Company has an annual average of less than 50 full-time employees.

Risk assessment

The Company maintains an entity-wide enterprise risk management framework. The risk processes address the nature and scope of business activities and the specific risks of the Company. The Board of Directors of the Company are responsible for assessing risks related to the financial reporting process and for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed by, or under the supervision of the Finance Function, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's statutory financial statements in accordance with Swiss accounting and financial reporting legislation.

The Company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with Swiss accounting and financial reporting legislation; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

The Board of Directors of the Company regularly meets with management, the independent registered auditors and the internal auditor; approves the overall scope of audit work and related fee arrangements; and reviews audit reports and findings.

Business year 2018

The Company reported a net loss after taxes of USD 4.1 million in 2018 compared to a net loss of USD 14.8 million in 2017. Gross written premium decreased by 4.37% to USD 91.3 million of which USD 34.1 million (or 37%) was written in direct insurance and USD 57.2 million (or 63%) was written in reinsurance business. The Swiss head office and its Bermuda Branch recorded USD 52.6 million and USD 38.7 million of gross written premium, respectively. The combined ratio improved from 129% in 2017 to 110% in 2018 due to the improvement in the underwriting approach and lower operating expenses

Net premium earned totaled USD 62.7 million, which is an increase of 7% or USD 4.1 million compared to prior year due to business mix. The net losses and loss expenses decreased by USD 5.8 million to USD 55.7 million, which resulted in an improvement of the net loss ratio of 16.1% points compared to 2017.

Allied World Assurance Company, AG Statutory Financial Statements Management Report 2018

Net acquisition costs of USD 3.2 million and USD 3.8 million were incurred in 2018 and 2017, respectively. Administrative expenses decreased by USD 0.7 million to USD 9.8 million in 2018 compared to USD 10.5 million in 2017 and mainly consisted of personnel expenses, professional fees and depreciation. The expense ratio was 20.8% in 2018 compared to 24.4% in 2017. The total insurance activities resulted in an underwriting loss of USD 6.0 million in 2018.

At December 31, 2018, total assets were USD 506.4 million and total liabilities were USD 332.5 million; gross reserves for losses and loss expenses were USD 249.6 million; unearned premium reserves, gross were USD 31.0 million; and equalization reserves were USD 21.4 million. The Company maintains tied assets in the amount of USD 202.6 million to support direct insurance liabilities of USD 173.0 million. The total portfolio of fixed maturity investments of USD 344.0 million consisted of global corporate and government bonds and one Swiss government security. Shareholder's equity at year-end was USD 173.9 million.

Business Objectives

The Company is a specialty reinsurance and insurance company that seeks to write a diversified portfolio of property and casualty business through its main office in the Canton of Zug and branch office in Bermuda. Its business objective is to write and grow a profitable book of business, which is diversified by business mix and geography and which contributes positive returns on equity to the Holding Company. The insurance activities focus on medium- to large-sized commercial clients in Switzerland and the United States where the Company offers general casualty and professional liability lines of business. The Company also offers property, general casualty and professional liability reinsurance products, primarily to clients in northern and central Europe and the Middle East.

<u>Outlook</u>

The Company aims to take advantage of pricing improvements anticipated in 2019, to write profitable business in Europe and to utilize the Bermuda branch to attract further new business opportunities. The Company will continue to seek specialty product opportunities within its stated business strategy that will offer the most attractive returns on its investment.

1. Corporate information

The Company's principal activity is to underwrite first and third party insurance and reinsurance risks. The Company was incorporated in Switzerland in the Canton of Zug on May 6, 2010 and is regulated by FINMA pursuant to the Insurance Supervisory Law. The Company is an indirect subsidiary of Fairfax Financial Holdings (Switzerland) GmbH, which prepares consolidated financial statements according to the International Financial Reporting Standards ("IFRS"). On July 6, 2017, Fairfax Financial Holdings Limited, Canada acquired through the Fairfax Financial Holdings (Switzerland) GmbH, the Company's then ultimate parent, Allied World Assurance Company Holdings, AG, which then merged with Fairfax (Switzerland) GmbH and the surviving entity was renamed Allied World Assurance Company Holdings, GmbH and is referred herein as the Holding Company. The Company has its head office at Park Tower, Gubelstrasse 24, 6300 Zug, Switzerland. The Company has an annual average of less than 50 full-time employees.

The balance sheet is shown as of December 31, 2018 and December 31, 2017. The income statement reflects the results of operations for the year of January 1, 2018 through December 31, 2018 and January 1, 2017 through December 31, 2017.

2. Significant accounting policies

The Company's Statutory Financial Statements are presented in accordance with the revised Swiss accounting and financial reporting legislation, Art. 957 to 962 Code of Obligation, and the relevant insurance supervisory law, particularly with regard to the revised Insurance Supervisory Ordinance and the revised Insurance Supervisory Ordinance - FINMA. The reporting and functional currency for the Company is United States Dollars ("USD"). Additionally, the Swiss Franc ("CHF") amount is shown for informational purposes. Unless otherwise stated, all amounts are rounded to the nearest thousand USD and thousand CHF.

a) Cash and cash equivalents

All cash and cash equivalents are considered to be cash on hand, deposits or highly liquid investments with an original maturity of three months or less at the time of purchase.

b) Investments

Fixed maturity investments

Investments in fixed maturity investments are carried at a maximum value equal to their amortized cost less impairment. Investment income comprises income received and receivable on fixed income securities, interest earned and accrued on cash and realized gains and losses on disposal of investments.

Real estate

Real estate held for investment and for own use is carried at cost value less depreciation.

c) <u>Insurance reserves</u>

The reserve for losses and loss expenses is comprised of two main elements: outstanding loss reserves (also known as "case reserves") and reserves for losses incurred but not reported (also known as "IBNR"). Case reserves relate to known claims and represent management's best estimate of the likely loss settlement. IBNR reserves require substantial judgment because they relate to unquantified events that, based on industry information, management's experience and actuarial evaluation, can reasonably be expected to have occurred and are reasonably likely to result in a loss to the Company.

The unearned premium reserves represent the share of written premium for unexpired risks as at the balance sheet date.

Equalization reserves are calculated based on the business plan approved by FINMA.

d) Long term debt

Mortgage and other long term debt are valued at nominal value.

e) Foreign currency transactions

Monetary assets and liabilities denominated in foreign currencies are translated into USD at the exchange rate in effect on the balance sheet date. Non-monetary assets and liabilities denominated in foreign currencies are translated into USD at the historical exchange rates. Foreign currency revenues and expenses are translated into USD at the exchange rates prevailing during the period.

f) Foreign currency translation

Although the Company's reporting currency is USD, the Company also presents the financial statements in CHF. For the translation into CHF, the following methods were applied:

- Equity positions were translated at historical foreign exchange rates, whereas all other positions of the balance sheet presented were translated at the closing rate on the date of the statement of financial statements;
- Income and expenses were translated at the annual average rate; and
- All resulting exchange differences (gains and losses) were recognized in equity.

USD/CHF	2018	2017
Year-end rate	0.9941	0.9846
Annual average rate	0.9751	0.9834

g) Direct tax expenses

Direct tax expenses include Swiss and foreign income tax expenses and capital tax expenses in Switzerland.

3. Insurance balance receivables and payables

The following tables show the current insurance balance receivables and payables as of December 31, 2018 and December 31, 2017.

Insurance balance receivables	20	18	2017		
as of December 31, (in 000's)	USD	CHF	USD	CHF	
Receivables from intermediaries *	18,956	18,844	16,778	16,519	
Receivables from (re)insurance companies	117	116	968	953	
Receivables from group companies	234	233	-	-	
Total Insurance balance receivables	19,307	19,193	17,746	17,472	

Insurance balance payables	20	18	2017		
as of December 31, (in 000's)	USD CHF		USD	CHF	
Payables to intermediaries *	1,461	<i>'</i>	228	224	
Payables to (re)insurance companies	1,039		2,632		
Payables to group companies	5,514	5,481	-	-	
Total Insurance balance payables	8,014	7,967	2,860	2,816	

^{*} The position from/to intermediaries includes balances to (re-)insurance companies, which act as intermediaries for the respective policy/treaty.

4. Other receivables and payables

Unearned premium, net	17,812	17,707	24,300	23,926	
Equalization reserve	21,405	21,278	18,540	18,255	
Total Insurance reserve, net	215,274	214,003	203,271	200,141	

6. Shareholder's equity

On the date of incorporation, the share capital of the Company amounted to CHF 0.1 million. On March 30, 2011, the Company obtained a license to conduct business in both the direct insurance and reinsurance markets (with the exception of life assurance activities) and changed its principal activities accordingly.

At that time, the Company also issued 9,900 fully paid-in registered shares at a par value of CHF 1,000 each. Total share capital after this capital increase amounts to 10,000 fully paid-in registered shares at a par value of CHF 1,000 each, totaling CHF 10.0 million as shown in the table below. Additionally, Allied World Assurance Company, Ltd, Bermuda, contributed CHF 40.5 million to the Company on March 30, 2011. On March 31, 2011 the Company became directly owned by Allied World assurance Company Holdings, AG (the predecessor to the AWAC Holdings). On March 30, 2012, Allied World assurance Company Holdings, AG further contributed an amount of CHF 99.3 million to the Company's capital. On July 7, 2017, a capital cash contribution of USD 0.5 million (CHF 0.5 million) was made to the Company in connection with the acceleration of share-based payments as a result of the acquisition of Allied World Assurance Company Holdings, AG by Fairfax Financial Holdings Limited.

The following table details movements in shareholder's equity from January 1, 2017 through December 31, 2018:

	Share	capital	Statutory capital F		tal Retained earnings		gs Total	
in 000's	USD	CHF	USD	CHF	USD	CHF	USD	CHF
Opening balance as of January 1, 2017	10,112	10,000	141,326	139,758	40,861	45,676	192,299	195,434
