

Industry-Leading Vendors

Our cyber policy provides insureds with access to a set of leading breach response vendors and other specialists in the event of a cyber incident. We take great pride in the expertise, flexibility, service and value that our panel of experts provide insureds.

Breach Consultants: A \$0 Retention on Breach Consultation when Engaging Approved Providers

Our breach consultation coverage is the first line of defense for our insureds by providing them with professionals dedicated to responding to potential cyber incidents 24 hours a day. Our breach consultants quickly work with insureds to evaluate the size and scope of the incident and engage additional incident response vendors as needed. Further, our breach consultants provide legal advice and consult in navigating privacy laws, regulatory response, media communications, notification letter content, vendor selection and other issues integral to incident evaluation and response.

As time is of the essence in all cyber incidents, Allied World has coordinated a panel of breach consultants and incident response vendors on all policies in advance of any breach. By working with a panel of approved vendors, Allied World seeks to minimize the stress and burden on the insured to identify and evaluate breach vendors (typically post-breach and often under duress). As part of our form, using our approved breach consultant is considered a first dollar coverage benefit.

Expert Insight and Proactive Response

Once an initial review and assessment is complete, breach consultants work with our insureds to determine what additional incident response services are needed and identify the most appropriate vendor(s). Allied World's pre-approved vendors assist in the areas of data forensics, incident response and public relations. Services include data forensic collection and analysis, public relations, notifications to the affected individuals, establishment of a call center, identity theft repair products and triple-bureau credit monitoring services.

Flexibility

Insureds with existing vendor relationships can request pre-approval of these vendors as part of their policy. Our cyber claims response team works closely with our business partners to evaluate and approve these vendors.

No Size Restriction

Regardless of size of account or limits purchased, all insureds have access to Allied World's expert panel of incident response vendors.
