

CONSTRUCTION INDUSTRY

Organizations of all sizes face an entirely new world of risk today. Allied World understands that risk control plays a key role in the management of our clients' business. Through our strategic partnerships with many of the world's top safety consultants, we provide access to effective risk management and loss control services to help avoid or mitigate losses. Many of these value-added resources are complimentary to our policyholders.

RISK MANAGEMENT RESOURCES

- Construction Risk Assessments:** Desktop, telephone and on-site surveys can be provided during a project to identify risks to employees, third parties and property. Risk assessments include the review of safety programs, contract management, recordkeeping, regulatory compliance, quality control, job site operations and subcontractor management. Compliance and loss control improvement recommendations will be provided.
- Detailed Loss Analysis:** A comprehensive review of an insured's loss history can provide insight into loss trends and the root causes of accidents. The findings of the analysis are used to determine the proper corrective measures that should be implemented.
- Safety Training:** On-site, classroom and web-based training including OSHA 10 and OSHA 30 is available and can be customized to meet the specific needs of the insured. Additional online resources are available to assist with safety meetings, tool box talks, checklists, forms and regulatory compliance.
- Safety Program Review and Development:** OSHA construction safety standards are vast and ever changing. Safety professionals can review existing safety programs or assist with developing new written safety policies, procedures and training requirements based upon current OSHA standards.
- OCIP/CCIP Administrative Services:** A wrap-up may be an effective way to exercise more control over a project and may result in a more cost effective risk management program. Wrap-up consultations and management are available from customizing the project specific requirements through the duration of the project.
- Whitepapers and Webinars:** Timely and important construction and safety issues are covered on topics including new and pending regulations and standards, emerging technologies and procedures, cost saving measures and industry best practices.
- Drone Business Solutions:** Integrating drones into business operations may help enhance worker safety, improve decision making, reduce risk and lower costs. Policyholders can receive a consultation from aviation industry experts covering the latest updates in regulatory compliance, pilot training, hardware, software, data analytics, operational safety standards and best practices.
- Slip, Trip & Fall Prevention:** Policyholders receive access to a National Floor Safety Institute (NFSI) web portal that includes slip, trip and fall policies and training programs, an overview of consensus industry standards, educational materials and expert slip, trip and fall advice via phone or email.
- 24/7 Web-Based Training:** UL's PURE™ Safety On Demand provides access to a single source, web-based training library offering over 700 discounted workplace health and safety courses coupled with an automated tracking, reporting and certification process to simplify and centralize training management.
- BLR® Regulatory Compliance Platform:** Online OSHA and EPA regulatory compliance tools including industrial safety training resources, assessment and inspection checklists, federal and state regulatory development notifications and "Ask the Expert" advice.
- Fleet Safety:** Access to a full best practices review, on-road, online or classroom training, National Safety Council (NSC) distracted driver training, train-the-trainer certifications, vehicle monitoring 24-hour decal programs, driver hazard perception evaluations, Motor Vehicle Record (MVR) continuous monitoring and vehicle telematics, including driver coaching.
